Subject: Flathead County Conservation District meeting

Flathead County Conservation District Board met last night and discussed the CFAC 310 permit applications for removal of floor slabs from the river, and for constructing the rock rip-rap trench to protect the south pond. The floor slab removal action was approved without much discussion. The rip-rap project generated some discussion regarding loss of vegetation and the size of the construction project. In the end, the Board chairman recommended approval of the project in order to protect the ponds. The Board voted in the affirmative and the permit was granted. Morrison-Maierle is finalizing the request for bid packages today.

In separate correspondence, the Army Corp of Engineers had a question regarding wetlands, which Morrison-Maierle answered. As soon as they hear back from the Army Corp of Engineers that the answer is satisfactory, the request for bid packages can be sent out.
